

## All economic activity serves the common good

*Bavarian Constitution, Art. 151 (1)*

### Our contribution

- To reconnect to public welfare and public spirit: Individuals can only thrive when the community as a whole prospers.
- To steadfastly support evolution to sustainability and future viability – with elan!
- To deliver the fundamentals for a Regional Economic Community, in which joint ownership, co-determination and transparency are achieved.
- To build up Regional Marketplaces, where all citizens, professionals, tradespeoples and companies can trade with each other – and also engage the town council.
- To offer a concept for sustainable regional economies which is as complete and well-designed as possible, yet remains open for modification and enhancement.

Together we can change the world

### Actively caring for our own livelihoods – taking the future into our own hands, now:

- Acting together for the common good
- Focussed on a viable, sustainable future
- Ecologically – Economically – Socially
- Thinking globally, acting locally

We can – and must – decide and act now in ways that allow us to look forward to the consequences!
